

# Full Service patient recruitment agency

Patient recruitment for your single country trial without the burden for your site staff

## Patient Recruitment

Patients learn about your clinical trial and are redirected to our local Link2Trials website to subscribe to your trial.

- Link2Trials local patient databases
- Link2Trials local social media channels
- Online (social) media advertisements: Facebook, Instagram, Snapchat, Youtube, Google, Etc.

## Patient Qualification

Let us do the work for you! Link2Trials will pre-screen the patients with an online questionnaire.

With this online questionnaire we can pre-screen on the basic criteria like age, gender, BMI etc. and we can add study specific questions to further specify to our study population.

Choose the number of pre-qualified referrals you need for your trial. The numbers are the average recruitment numbers. Results may vary based on location and indication. All packages are a onetime fee and include both our study recruitment and patient pre-qualification
